

## Gravotech, manufacturer and global leader in permanent marking will attend LASYS!

For this first participation, Gravotech will introduce its totally NEW laser marking and traceability solutions. Other innovations in marking, engraving and laser cutting will be presented on the manufacturer's stand, from May 31st to June 2nd, on the LASYS Exhibition.

### **Exclusive: Gravotech unveils laser marking solutions for marking tomorrow!**

The traceability marking expert totally redesigned its laser ranges and present the newest solutions: Fiber-Series, Hybrid-Series, Green-Series and CO2-Series.

Discover the most complete laser marking offer on the market!

Among the major innovations :

- New 3D module: guarantees quality marking on multi-level surfaces or inclined surfaces.
- Vision Manager: integrated vision system that ensures full traceability. Detecting the piece to mark, instant control of 2D codes content and data recording.

These innovations are real technological breakthroughs and allow to cross new boundaries in traceability marking.

### Participate in software demonstrations

Visitors looking for new products can attend software demonstrations. Gravotech is one of the few manufacturers to develop software solutions for CAD – CAM and the software management of its machines. Discover the completely re-designed Gravostyle™ 8 software for controlling Gravotech's engraving machines, as well as 3D laser engraving capabilities of LASERTYPE, the professional software solution designed for laser machines.

### See the latest machines in the stand:

- The new LS900 fiber laser engraves a wide range of metals with high quality contrast.
- The large size LS1000XP laser quickly cuts and engraves objects of all sizes, either individual pieces or batch quantities in a series.

### Gravotech: 20 years of expertise in laser technology

With over 20 years in laser technology, Gravotech uses all the properties of the laser beam and its different wavelengths to enrich the mastery in permanent marking and provide an ever-expanding range of applications. Gravotech lasers are now widely used in commercial, institutional and industrial applications whether in personalization, engraving, cutting or identification contexts.

**Find all the Gravotech innovations in permanent marking and engraving from May 31 to June 2 in Hall 4 Stand 4A35.**
